We can but Samples DSE-09, DSE-12 and DSE-15 are only for overland flow HRS analysis, and they will probably be clean since that area is higher than the pits and the associated drainage ditch to the west and south. Our samples (Removal Assessment) are -06, -11 and -14 which are located closer to the pit berms to determine if any lateral migration of contamination has occurred outside the berm area.

Jeff:

Can we add one sample location north of DSE-09/ East of DSE-06 (along the line of the sample locations along the Bayou)? Everything else looks good to me.

Brenda:

Please take a quick look at the QASP.

Thanks

Here's the final version of the QASP along with the Figures. I spoke with Denece and she said it should be uploaded to TeamLink pretty soon.
